

WATERCOLOURS

All the materials you need to produce beautiful paintings

Welcome!

Buy less 'quantity' and more 'quality' watercolours, paper and brushes especially if you are starting out!

It is tempting to get the cheapest art materials but they are the most difficult to use and Jane knows unfortunately from experience. Look out for at least 'Student Quality'. Follow the Jane's recommended links below to buy your supplies online. 'Artist Quality' is the best but some colours are more expensive. Follow this simple list and it will help you from day 1

Types of Watercolours

Tubes or Pans?

Pans are concentrated colour, they come usually in a small case for travelling for example. Downside: no paint name on them, they need wetting and this can be tricky. Tubes: easy to use and they have paint names on them which is very handy for your learning about how to mix colours

BRUSHES

Soft to the touch watercolour brushes allow the colour to flow, see the set by Jacksons below
